"Who you know" was once considered to be the criteria for success. Later, the important thing was thought to be "what you know." Today, the important thing is how well you have mastered the skill of learning. Once you have mastered this skill, no task is beyond your ability.

I encourage each of you to work diligently at the job of learning to think and learning to learn. Dedication to this goal is the beginning of a true education.

Where will you find yourself in a year or two?

Join the Air Force and you will find yourself doing a great job at an exciting duty station. That's because the Air Force gives you the chance to learn a skill, and the chance for foreign travel. Just two of the reasons thousands of young men and women enlist each year.

Whatever your goals are, Air Force training and travel can take you a long way toward getting your future off the ground.

Find yourself in the United States Air Force
